

 **Pharmacist**  Version 1.0  Scope

 **P389192:** The scope of privileges for a Pharmacist includes evaluation and interpretation of physician's orders (written and verbal) for appropriateness of drug therapy, and monitoring for drug interactions, overdosage and adverse reactions. Pharmacists prepare, compound, and dispense pharmaceuticals for patients of all ages in the inpatient and outpatient setting, conduct education for patients and healthcare professionals, and ensure proper handling and dispensing of investigational drugs.

 **P389194:** The scope of privileges for a Clinical Pharmacist includes the evaluation, management and consultation regarding drug therapy for patients of all ages with selected diagnoses defined by MTF policy. Clinical Pharmacists obtain a health and drug history, perform limited physical assessments to assess drug therapy, evaluate the need for and interpret relevant laboratory tests, prescribe the most appropriate treatment regimen and educate patients regarding their medications. Clinical Pharmacists recognize and ensure appropriate remediation of improper drug selections, subtherapeutic dosages, failure to receive drugs, overdosages, adverse drug reactions, and drug interactions in the inpatient and outpatient settings.

  Diagnosis and Management (D&M):

 **P385998:** Prescribe medications in accordance with Military Treatment Facility (MTF) Pharmacy and Therapeutics (P&T) policy

 **P389196:** Pharmacokinetic monitoring

 **P389198:** Prescribe total parenteral, peripheral parenteral, or enteral nutrition in accordance with MTF P&T policy

 **P389200:** Administration of oral or IV medications for nausea associated with oncology (antineoplastic) or radiation therapy

 **P389202:** Administration of emergency medication for anaphylactic drug reactions or drug extravasations while awaiting the attendance of a physician

  D&M Advanced Privileges (Requires Additional Training):

 **P389204:** Perform primary clinical Pharmacist duties and responsibilities in the specialized area of Nuclear Pharmacy

 **P389206:** Perform primary clinical Pharmacist duties and responsibilities in the specialized area of Oncology Pharmacy

  Procedures:  Other (Facility- or provider-specific privileges only):
